We are thrilled to offer the Vigorosa line of amazing roses from W. Kordes Sohn of Germany

With over a century of rose breeding behind them and a goal of breeding roses which require very little to no pesticide use, Vigorosa Roses are set to take off as a wonderful group of landscape and specimen sustainable roses.

The Vigorosa roses have been very popular in Europe for years. It is time these hardy, disease resistant beauties graced the gardens of North America. They are the next generation of Landscape roses replacing the Carpet and Meidiland series.

Our 2013 availability is in our liner size which are great for potting into a 2 gallon pot for sales in spring 2014. All liners come with a colour patent tag.

Please contact us for more information.
