

U of S Haskaps

Haskap, Blue Lonicera, are an exciting new crop for North America. U of S varieties taste something like blueberries & raspberries. They are high in antioxidants. Plus another great *grow your own* unique fruit!

They are eaten fresh, frozen or dried. Plus they make wonderful jams, jellies and sauces.

Hardy!

Zone 3 Minus 45

Tasty!

fresh, frozen or in jams

Healthy!

Antioxidant and Vitamin C
